

November 8, 2014 - Special Pre-recorded Satsanga - Dolores Cannon Memorial

Transcript of Recorded Session by Guy Needler:

“This is a special Satsanga to celebrate the life of Dolores Cannon held on the 8th of November, 2014. And I’m going to look at two main subjects to do with Dolores.

- 1) The Three waves of volunteers (a summary of why they are here and the variations in Hybrid children, including, the White Children)
- 2) Why Dolores Passed away when she was supposed to see and ascend into the New Earth
- 3) What is the New Earth?

The first one is the three waves of volunteers. I’m going to give a summary of why they are here and the variations in the types of volunteers, which is the hybrid children and the White children. And what the New Earth is. And a third item I’m going to look at is why Dolores passed away when she was supposed to ascend into the New Earth.

So the three waves of volunteers were basically individuals, who decided to incarnate at a higher frequency level than was required or was normally available on Earth. And each of them was designed as a body, a frequential condition, so the souls themselves or the aspects themselves that incarnated the bodies were allowed to have a higher level of functionality, a higher level of frequential functionality or a higher level of connectivity with their higher selves, their True Energetic Selves and Source.

And their very presence here, as they came in various different numbers, was here to increase the frequencies, the base frequencies of the Earth and accelerate their own evolutionary condition. Now each of them was a progressive state, and without being in any particular order, the first group that came in were really battling against the head wind, because we’ve come out of a World War condition, and they were here to help move us forwards.

And in some respects, that’s why the Flower Power generation was started, because these individuals came in, and they were full of love and they wanted to move forward to, you know, everybody working together, everybody loving each other, everybody working for in service to each other. And they wanted everybody to be, you know, in understanding of what they truly are, right down to their true potential. This, of course, started slowly to die out, as it became more integrated into a...this condition.

And the next wave came in, who were slightly more advanced and slightly more capable of dealing with the higher frequencies and some of the dips in lower frequencies. And this is the issue here. It was the sudden dips, because when we ascend, we ascend in a, on average, in a slow and gradual way. But there is ups and downs. It’s almost like a saw tooth progression, that has a nominal value of being upwards.

So the next series of children were a different frequency. Their physical form was allowed to work with a different frequency, and so their ability to contact their True Energetic Selves or their higher selves, sometimes called a Godhead, sometimes called the overall, the oversoul, or the overall soul, as I’ve been told to call it recently. [They] were here to progress the condition from that situation, because we were going to the Cold War by then, and everything else needed to be increased in frequency, because we were almost dropping back into a war-like condition.

So the first generation of children came in to lift us up from the World War situation. The second were actually to lift us out of the Cold War situation in real terms. The third, which are only just coming in or have just been coming in, in the past 10 or 15 years, are really much higher

frequency. And you can tell the difference in these individuals. They're able to pick things up quickly. They come into their incarnation in a semi-aware condition. Their intuition is higher. Their ability to contact Source is higher. Their ability to contact their own higher selves or True Energetic Selves is higher.

(4 min) And so they're moving us much, much faster and forward in a much faster way. These children have unique properties sometimes, and in some of them coming in they are fully functional at 5 years of age. And we've seen some children who are, you know, shall I say mathematical masters now in their teens, for instance. And this is an example of these individuals, who are able to access the cosmic knowledge, as it were, their knowledge of Source rather than work it out through being here.

So each of these, and the names and this is in no particular order: rainbow, indigo and crystal children were here and are here to help increase the frequency, the base frequencies of the Earth. The, in essence, lifting the frequency of the gross physical vehicle to allow the aspect or the soul to have a higher level of functionality whilst incarnate, to remember who and what we are, and be able to communicate with our selves in a more profound way, more importantly, to allow us to work together in a more profound way, rather than in an aggressive way or in a selfish way.

(5 min) The thing with these children is that they are specialized. They are specialized for certain frequencies. And so when they came in, when the frequencies changed, they weren't all coping, and some of these children have been very... they've had very difficult incarnations here. And an awful lot of them committed suicide as a result of that. They got out early, which is a real problem, because they have to sort a lot of things out, and their guide and helpers have to sort a lot of things out in the downstream function of their existence, based upon who they would have interfaced with, and who they would have communicated with, who they would have learned thru communication with and working with and subsequently evolved, and all the downstream fractalizations of that.

(6 min) And so there's been some hybrid children coming in now. And the hybrids are a mixture. There's three 3 basic hybrids:

1. There's one, which is a mixture of indigo and rainbow, and
2. Then there's a mixture of indigo and crystal, and
3. Then there's crystal and rainbow.

Those are the basic hybrids, so it's a - you're a mixture of two of each of the three different hybrids. But more recently, and certainly in the last 5-10 years, there's been a more complete hybrid being allowed to be born, or should I say, souls are being allowed to incarnate in a vehicle, which is more hybrid. And that hybrid includes all of the characteristics of the rainbow, the indigo and the crystal children's frequencies. So the human form has the characteristics of all three of those, rather than any two of those three.

And these children are much more complete. They're much more able to cope with the ups and downs of frequency, the frequential changes, the locally high frequencies and the locally low frequencies that we get on Earth. And so they can ride out some of the hard work that happens, when we have a slight frequential drop, which we're having at the moment, by the way.

This is why a lot of people are getting anxious, a lot of people are getting scared or concerned or are having troubles, because we are having a little bit of a downward turn. But a lot of these signs of anxiety, etc. are also because people are ascending, you know, we are ascending gradually up the frequencies. So the hybrid children in their various formations, the first 3 types of hybrid, of course, are the hybrids of any two of those conditions, either crystal, indigo or rainbow.

(8 min) And the more complete hybrid, which is a very recent thing, is there to cope with everything. And so they are more robust, again much higher frequency. The soul or the aspect can operate within that form in a more complete way, more intuitive way, more connected way with their Source and with their True Energetic Self, and also interface with everybody here. You know, the normal individuals who aren't aware and awake, who aren't even concerned about spiritual matters. They can work with those and they can work on a higher plane with people who are highly advanced spiritual individuals.

There's another group of children, which are coming on board as well, and they're extremely rare. And I was told to call them the White Children, and there's only going to be 12 White children. And these are individuals, who are extremely aware and awake from birth. They are going to be of the same classification of, or should I say, the same classification as, but they won't be ascended masters.

(9 min) The ascended masters have been and gone. They've done their term in terms of being incarnate and have come back and helped us in various different epochs within the use of the human form. But these individuals, these 12 White Children, who will be equally spaced around the Earth. You know, think of it in terms of being around 12 points on the Earth equally spaced, so there's always one of them that is contactable or who is always active doing something spiritual to help the Earth. They are of that nature, they are of that ascended master nature. They will have that level of ability whilst incarnate. Although they aren't THE ascended masters, they are in essence, they may be classified as the new ascended masters later.

And so the three waves of volunteers, that Dolores talked about, really just focuses on the first three sets of children, the rainbow, indigo and crystal children. And the information I've got, which actually builds upon Dolores' work, which is what it's all about. It's all about progression, talks about the hybrid children, the hybrid children that were with any two of those frequential capabilities of the indigo and rainbow, or indigo and crystal, or crystal and rainbow, and also progresses further to understand that there's a greater level of hybrid children, who cope with, who can cope with everything by having access to all three of those different abilities at any one time. And then further still we've got the White Children.

So in real terms, the information that I've got in complete independence of Dolores' work, because actually I've not read that particular book - and I haven't read any books of anybody for probably more than 10 years now - justifies her work and justifies the progression that's there. I'm not interested in my own work, I'm just showing what I've picked up as a result of the work that I've done, but there's progression there. And that shows the validity of the information that's come through from Dolores Cannon.

(11:20) Okay, I'm going to talk about the New Earth in a moment, but I want to talk about why Dolores passed away first, when she was supposedly supposed to have ascended with the New Earth. Well, these two subjects might blend into each other actually, but the thing is that Dolores saw the New Earth, she was part of the New Earth. I'm going to explain this later for you to understand it, but the New earth is here now. We're working with it, we're existing within it. We are experiencing it right now.

And so when she was told she was going to see the New Earth, and there would be two Earths, and right now there is two Earths, or at least two Earths - and I'll explain that later, yeah. She was experiencing it. She was in one Earth, there were lots of others in another Earth, but we're all here together. The thing is when we're with the higher Earth, we see the lower Earth, we experience the lower Earth as well. Those in the lower Earth don't experience the higher Earth. That's part of the function of what is a new Earth, and I'm going to, I need to go into detail with that, because it's important for you to understand.

But really Dolores Cannon had achieved what she needed to achieve. She had educated us all through her hypnosis, she had provided a form of a new healing modality through the quantum healing hypnosis. It was extremely important work that she'd done. She had moved us from being basically in the spiritual gutter 45 or 50 yrs ago, when she first started to being in a much more enlightened condition. And so her work was done.

(13 min) And her physical form had ascended into this new frequency level that she was working with. And those who were on her level were there with her, as I was, as Julia was, her middle daughter, and the other daughters as well, and you know, everybody who is part of the spiritual scene, who is working and striving to understand more, who are the true truth seekers, are there with her.

So when we experience the New Earth, we see nothing different, but we experience the augmentation of our abilities, a change in our intuition. So in this respect, Dolores had experienced it. She'd been working with it, she'd helped with it, and she'd grown with it. And because we grow with it slowly, we experience our changes in a slow way. We get normalized to it, so we don't see a step change, we grow into things and we experience it slowly. We get normalized to it, it becomes normal, it becomes everyday.

(14 min) So when we're in the New Earth, we don't realize we're in the New Earth. So the perspective of Dolores Cannon, it was time for her to go. She'd done her job, she had ascended with the New Earth, been part of it, been part of nurturing the people, who wanted to understand the greater reality. And it was time for her to leave her physical form.

Ascension doesn't always mean that you keep your physical form. Why would you want to keep an old car, for instance, unless you make it a classic car? But the thing is the aspect, the soul, the part of the True Energetic Self that's projected into the physical form, only uses the human vehicle and other incarnate vehicles, that are scattered around the various different frequencies of the physical universe, for a transient period of time. It's only a suit of clothes that we use, it's only a set of scuba diving equipment to allow us to venture under the sea and experience lower frequencies. And then when we finish that, we come out.

(15 min) So her guide and helpers worked with the terminal juncture of her existence, that point in time, where she can leave, and can leave without incurring karma. And by the way, we have between 3 and 5 of these throughout our lives, terminal junctures, where we can leave the physical form without incurring karma, without creating a problem with our downstream activities that occur from us communicating with other people, and them experiencing and learning from us and vice versa. And then those progress further on down in a fractal way.

These junctures are there to help us move out, if we need to. And I believe I've gone past 5 of mine, so now I'm here for the duration. But in Dolores' case she got to the end, therefore, there was no need for her to be here. The guide and helpers invoked that termination juncture, and she left the body in the way that she was supposed to.

(16 min) And so we have to see this from a different perspective. If you think of Dolores as being a master, a master knows when it's time to go. A master knows when his or her work has been successful. A master knows when there are students there, who are also becoming masters, who can take the work further than the master. So the master knows when to leave, because they know when their very presence hinders the progress of those other masters, that they have created around them to progress further and take the work further and higher.

So that's why she passed away. She didn't need to be here, she'd ascended anyway. Her guide and helpers realized that she'd done her work. They took her out using the method that's been

there all of the time throughout her life plan, and she effectively left the earth knowing, as all masters do, that the work that she'd started was going to progress far beyond the level that she left it at. And that there's people in place to allow that specific function to happen.

(17:12 min) Okay, so let's talk about the New Earth. So what is the New Earth? The New Earth is a figure of speech and Dolores talks about two Earths: those that will be left behind, and those that will ascend with the New Earth. And the information I've picked up justifies this in a number of different ways.

Before I continue though, I need to explain a little bit about the information I've got about the structure of the multiverse. The multiverse has a basic building block and that building block is frequency. And there are a number of frequencies within the multiverse. In essence, there are 408 frequencies, which create 397 simultaneous universes. These universes are completely independent and completely self-contained.

(18 min) These frequencies though, they attach themselves in general, this is from a certain structural point upwards, to a subdimensional component. So there's 12 frequencies associated with a subdimensional component. And these subdimensional components are attached to a full dimension, okay. Now a full dimension is a much higher piece of structure than mankind relates to, but I'm not going to go into that in detail now. But in essence, there are 36 frequency bands associated with a full dimension, and that's from the second dimension upwards.

Now then, the physical universe exists in the first full dimension. And because the physical universe is so low in frequency, because each of these frequencies is a progression, infinitude from one level to the next level, the first full dimension has these 3 subdimensional components, the same as the second, third, fourth, fifth, up to the 12th [full dimension]. But because it's associated with the lowest frequencies of the multiverse, it is quite low frequency, and therefore, those 3 subdimensional components compact down into one, which means there can only ever be 12 frequencies associated with the first full dimension.

Now these 12 frequencies, because they're low frequencies, they don't have enough content, they don't have enough space, so to speak, to hold a universe in their own right, which is what happens from the 13th, 14th, and 15th upwards. They've got enough infinitude to enable a whole simultaneous and fully independent universe to exist within one of those particular frequency bands. And so there's 12 frequencies required to create the physical universe.

(20 min) We currently exist within 3 of those, and our human form uses 10 of them in totality, because we have, we operate a step-down function, and we've got spirituo-physical aspects of ourselves and gross physical aspects of ourselves. That's information for another lecture and lectures I've given on this before explain it anyway. But in essence, what we have here is a condition, where we exist in certain frequency levels.

Now the physical universe is a panfrequency condition. Clearly it has 12 frequencies associated with it. And so is the Earth. And so from our perspective, we exist within the first 3 frequencies. When we look out into the universe, we see mostly nothingness with the odd star, the odd galaxy dotted around the environment that is the physical universe.

(21 min) If we were to get to the 12th frequency, we'd see much more content, because each frequency level allows us to see much more of what's in this universal environment. So if we go to the 4th frequency, for instance, we see more; the 5th frequency, we see more; the 6th frequency, we see even more. Go to the 12th frequency, and we can see, that actually where there's the 3rd frequency, the universe is mostly empty with the odd star or galaxy in there. At the 12th frequency, it's mostly full with the odd gap and that's it, because it's much, it contains all of the information that's there within the physical universe.

So when we ascend, we ascend up these frequencies. We ascend within the frequencies associated with the physical universe. And so from our perspective, as we move forwards, we start to use the 4th frequency band. We move from the 3rd, the first 3 frequency bands, and move into the 4th frequency band.

(22 min) And as we move up these frequencies, we start to see more. So right now in my room, as I'm doing this recording, I see with my 3-frequential eyes, not 3-dimensional, but 3-frequential eyes, which only has a limited bandwidth, of course, between 400-700 nm, I see the walls, I see the computer, I see the lights on the walls, I see the windows, I see the outside, I see the trees, the birds, the bushes, the hedges, everything around me.

If I start to use my perceptual vision, the vision that I've got as a result of my own personal work, I can work, move into the 4th level, or the 5th level, or the 6th level. When I move into the 4th or 5th level, I start to see or perceive what's happening in the same space, that I'm occupying now at that level though.

(23 min) And so there's much more happening on the 4th level, for instance. I can see another building across the way, which isn't here on this particular level. When I go to the 5th level, there's other buildings. When I go to the 6th level, the sky is full of craft, because clearly incarnate mankind is being observed by other incarnate civilizations, other physical forms that are being used by other souls or other aspects of other True Energetic Selves or oversouls or Godheads or higher selves, depending upon how you want to look at it, to allow them to experience incarnation but at different frequency levels.

So there's lots of different vehicles out there - much more besides humanoids. There's arachnids, there's reptilian types, there's gaseous types, there's semi-gaseous, semi-physical types, all at different frequency levels, all exist at these different levels. And they can experience the same space as we do, but we don't see them. Now because we don't see them, we don't believe that they're there. But when we move into these different frequency levels, we do see them.

So we're on this Earth right now existing in 3 frequency levels. We see what we see, we experience what we experience, we can touch and feel what we experience. When we move into the next [4th] level, we work on ourselves and we ascend gradually, of course, we start to perceive different things. We start to get intuition, which allows us to move into various different levels of, shall I say, ability. And part of that ability is to perceive or experience the additional content that's within the physical universe, but on this 4th level.

And so if we move into the 4th level, we experience that. We can also experience what's on the 3rd level, for instance, but people on the 3rd level don't see us. If we move into the 4th level, we "zone out," so to speak, of their perceptual range, because they're not on the same frequency level as us. So we can see people on the 4th level, and on the 3rd, etc. but not on the 5th.

If we move onto the 5th level, for instance, we can see people or objects or things happening on the 4th and 3rd level, but not the 6th. If we move to the 6th level, we can see things that are happening on the 4th and the 5th, of course, and the 3rd, but not the 7th. And if you move right up to the 12th, we can see everything. We see everything in the 12th, 11th, 10th, 9th, 8th, 7th, 6th, 5th, 4th, and of course the 3rd frequency levels. And so, therefore, we experience everything that's in the physical universe, rather than just a small part of it based upon the frequency level that we are currently existing within, based upon our evolution whilst incarnate

(26 min) And so this two Earth thing, this New Earth thing is based upon people moving into the 4th or the 5th frequency level. They move into that, because they're gradually ascending, their

frequencies are increasing, and so they get access to the different personal functionalities, there's different types of intuition, different types of creativity. And they're starting to perceive and communicate with other entities that exist on these different frequency levels, that are nevertheless incarnate, but they're on a different frequential condition, therefore, beyond our perceptual range, when we're stuck in the 3rd level.

So the people moving to the New Earth are people who have ascended to these frequency levels. They're still on the Earth. The Earth, remember, is a panfrequential body. It exists in all 12 frequencies associated with the physical universe. And so they continue to see the Earth as it is now, but with additional content, additional higher frequency content. And as they move up into those frequencies, they move out of our range of perception, if we stay here.

If we don't evolve, we stay here, we start to lose our friends, they move away from us, they suddenly disappear. But they can, of course, come down and work with us. They can change their frequency by intention and come and work with us again.

(27 min) So there are two Earths. Actually there's more than two Earths. There's more like 10 Earths actually, if you think of it in this way, because the first 3 frequencies are where we exist right now, okay. That's the first Earth. The New Earth that Dolores talked about is the next level, the 4th level. Then there's the new New Earth, which is the 5th level. And the new, new New Earth, which is the 6th level, etc. etc.

So as we go up the frequencies, we go into a new aspect of the Earth, a new level of content associated with the Earth, a higher level of frequency, and experience that's associated with it. We can still experience that which is below us, but we can't experience that which is above us. And so we experience that Earth, that we are capable of experiencing, as a result of our own ascension.

(28 min) So the New Earth is correct, and clearly Dolores experienced the New Earth, because she was able to understand and work with people, who are at a higher frequency and were a higher frequency. So the New Earth is here now. It is here right now and some people, they're already existing in the new New Earth [5th] or the new new New Earth at the 6th level and the 7th level. And so people are starting to work at different levels and having different levels of experience, but they're still here.

I like to use the example, a very good example actually, I like to think, there's no ego there, of when you're in a higher frequency, you're just not seen by people. And they bump into you on the street. They don't even know you're there. They look straight through you, for instance.

The example that I'm going to use now is what I've used on a number of occasions, where you go to a shop and you buy/take something off the shelf, and you go to the cashiers, and they don't serve you. And you go: Oh, okay, perhaps they're busy, perhaps they've got something to do first. Then somebody else comes along, and the cashier serves them first. And you think, hmm, that's a bit funny, isn't it? They served them first rather than me. I was here first, and they continue and then somebody else comes along, and they serve them before you. Then you start to get a bit angry and it's only when you get angry, that you start to be seen by them, because the anger is a low frequency condition, it's a low frequency response. So the cashier says: Oh, sorry sir or mum, I didn't see you there. They didn't see or perceive you there, because you were a higher frequency than them, and therefore, they didn't see you.

Now that's seeing it from one angle. Now Julia Cannon very eloquently suggested a couple of years ago, that she saw it from the other perspective, which I thought was an excellent example. She said she was driving on the freeway,. I can't remember now what the car was, let's say it was a black SUV. She saw this black SUV coming up the slip road to join the freeway and she

saw this car, and it came to the side of her, left hand side and right hand side, and it came behind her and then went to pass her, went to overtake her. And she said she saw this car come onto the freeway, come behind her, and then it was gone. And she said: Wow, where did that car go? It was there a moment ago, and then it was gone. And she looked all around her, she looked through 360 degrees, which is a bit difficult when you're driving a car.

And she said this car was not there, and she said maybe based upon my explanation that person in that car, because we do take our physical belongings with us when we move up the frequencies, was in such a high state of frequency that he was completely happy with driving and not aggressive in driving, and therefore went into a higher frequency plane, and therefore zoned out of Julia's level of perception. He may have gone into the 4th or 5th level, for instance, and Julia wasn't there at that point in time, wasn't able to move with him or didn't know where he'd gone to and was quite surprised at all this. It doesn't matter, the fact that she could have gone with him, but the thing is that at that point in time, she observed somebody moving up the frequencies, as against being observed, not being noticed in the higher frequency.

And so the New Earth is there. Dolores experienced the New Earth and that's why she passed away, because she'd experienced it. She'd done her job. She'd done and experienced everything, that her guide and helpers and those individuals who communicated to her through the hypnosis had told her. They said: You would experience the New Earth, and she did experience the New Earth. And therefore, it was time to return to the energetic.

And so the New Earth is really a progression. Each time we go up the frequencies, we go into a New Earth, still the old Earth but with more content, higher frequential content. We start to see new constructs that are there, such as buildings. We start to see other entities that are existing here or working on the Earth, other incarnate beings that are at a higher frequency, because there are incarnate vehicles, that we use throughout the physical universe, that exist in all 12 frequencies associated with it.

So for me, my understanding there totally validates the work that Dolores had done in explaining the New Earth. We're here now. When we ascend, and I've done a lecture on this, we ascend in a slow and gradual, repeatable and robust way. But because it's slow, we normalize to it, and therefore, we get used to it. It's not a knife edge or a cliff edge ascension. We don't go from 0 to 12 in 30 seconds, so to speak. We do it gradually, and so we get used to it, so it becomes part of normality for us.

(33 min) And so those of us, who are working with ourselves and working on experiencing a higher frequency existence, are experiencing ascension every day, even if it's in a small part, in a small way, but we are doing it in a gradual way. And so the New Earth is with us all the time, and some of us are moving onto New Earths, as we speak. We all move into a New Earth individually. Our ascension is individual. Clearly there are a group of us, who are...who have reached a certain level. If you want to call that group ascension, you can do. But we go individually, and we meet each other on these different levels individually. And so therefore, we are able to ascend individually and collectively in this way. And that for me explains the New Earth and the progression to the New Earth, and the fact we can go further and higher than that.

Meditation follows (at 34 min in audio recording).

(53 min) Closing comments by Guy Needler: So thank you for listening to this Satsanga, this special Satsanga celebrating the life of Dolores Cannon. We've justified the three waves of volunteers, and we've progressed beyond those three waves of volunteers, showing the hybrids, the partial hybrid conditions of the children and the full hybrids and the White children. And we've explained why she actually passed away, why she left her physical form. And we've justified the New Earth, and the fact there's more than one New Earth. And so

you can see that there was progression in the work that Dolores had done, and basically she provided a stepping stone for us all to work on. And those of us, who are working to progress as well, we'll also be considered stepping stones in the future.

So it's the role of the master to create masters. It's the role of the master to make a student the master of the master, so our ability can progress forwards. The master who tries to restrict the student to a level below themselves is not really a master. It's an individual who is selfish. A master should always have the desire to promote, teach their students to become masters of themselves and to go further than their master or guru.

Thank you very much for taking the time to listening to this recording. I wish you lots of God's blessings and Namaste." END (55 min).
